ABOUT ME

Innovative Full Stack Software Developer and AI Product Builder with hands-on experience designing, developing and deploying end-to-end digital products across education, fintech, gaming, wellness, e-commerce and community platforms. I specialize in transforming ideas into scalable products by combining modern software engineering practices with AI-assisted development workflows. My strength lies in building complete systems from concept to deployment, including: Product architecture, User experience design, Frontend development, Backend integration, Authentication systems, Database design, AI integrations, Administrative dashboards, Gamification systems, Data-driven user experiences. I actively leverage modern AI engineering tools such as Claude and Codex to accelerate product development while maintaining strong software engineering principles. I am highly adaptable, self-driven and passionate about creating products that generate measurable value for businesses and users. To secure a Software Developer, Full Stack Developer, React Developer, Product Engineer or AI Product Builder role where I can contribute to building innovative digital products that solve real-world problems while continuously expanding my technical expertise and product development capabilities.

WORK EXPERIENCE

Great Tech

Senior level | Software Developer
Nairobi , Nairobi
2023-06-01 | Currently working here

I work as a Software Developer where I design, develop and maintain web applications and digital products. My day-to-day responsibilities include building responsive user interfaces using React and TypeScript, integrating APIs, improving user experiences, and collaborating with stakeholders to implement new features. I also participate in product planning, testing, debugging and deploying updates. Some of my achievements include contributing to interactive platforms, dashboards and AI-powered product concepts while continuously improving application performance and usability.

EDUCATION

NCC

Diploma | Computing / Computer Science

ICDL

Certificate | International computer driving license

JOB SKILLS

React.js | TypeScript | Next.js

JavaScript (ES6+) | Responsive Web Design | Component Architecture

State Management | Performance Optimization | Firebase

Firestore | Firebase Authentication | Node.js

Django | REST APIs | Database Design

Product Design | User Experience Design | Dashboard Development

Gamification Systems | AI Product Development | User Journey Mapping

Git | GitHub | Claude AI

Codex | Vercel | Figma

React | HTML5 | CSS3

Firebase Realtime Database | Claude | UI/UX Design

Product Architecture | End-to-End Product Development | Full Stack Engineering

AI Product Building | Rapid Prototyping | Educational Technology Development

Financial Technology Solutions | Problem Solving

GITHUB PORTFOLIO

GitHub Profile: https://github.com/JaneWaruchoNgugi

Portfolio Highlights:

- 39+ repositories
- Interactive browser games
- Educational systems
- Financial applications
- Community platforms
- AI-powered products
- Dashboard systems
- Campaign websites
- Experimental product prototypes Key development strengths:
- Rapid product prototyping
- End-to-end application development
- Product thinking
- AI-assisted engineering
- UI/UX implementation

CAREER OBJECTIVE

To secure a Software Developer, Full Stack Developer, React Developer, Product Engineer or AI Product Builder role where I can contribute to building innovative digital products that solve real-world problems while continuously expanding my technical expertise and product development capabilities.
